# Summa notes

Description
Summa notes is an app that sends notes to the Summa MIS. This app only works together with the Summa business and order system.

For this app to work you have to enter the Summa OrderNo, this can come from a Submit point or as other sources of metadata like XML.
When a job passes through this app the note will be updated accordingly.

Compatibility
Switch 2017 update 2 and higher. Windows or Mac OSX.

> **Compatibility third-party applications**
> Connection to a Summa MIS is required for this app to work. The URL for the Summa system is needed together with account details.
> For information about Summa visit www.summa.se

Connections
The app has only one input connection and only one outgoing connection. No settings are available of the outgoing connection.
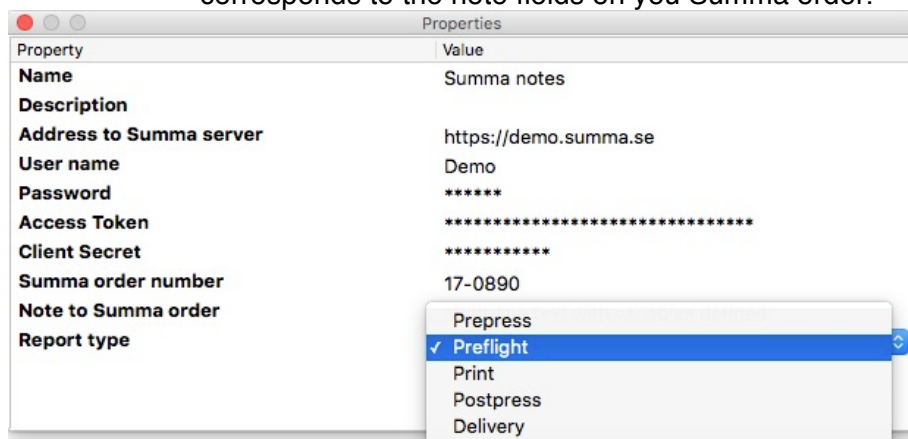

Properties detailed info

In the settings you have the connection details and login information and the color code for the status.
