

Summa Status Color

Description

Summa Status Color is an app that reports the job status back to the Summa MIS. This app only works together with the Summa business and order system.

For this app to work you have to enter the Summa OrderNo, this can come from a Submit point or as other sources of metadata like XML.

When a job passes through this app the job status will be updated accordingly.

Compatibility

Switch 2017 update 2 and higher. Windows or Mac OSX.

Compatibility third-party applications

Connection to a Summa MIS is required for this app to work. The URL for the Summa system is needed together with account details.

For information about Summa visit www.summa.se

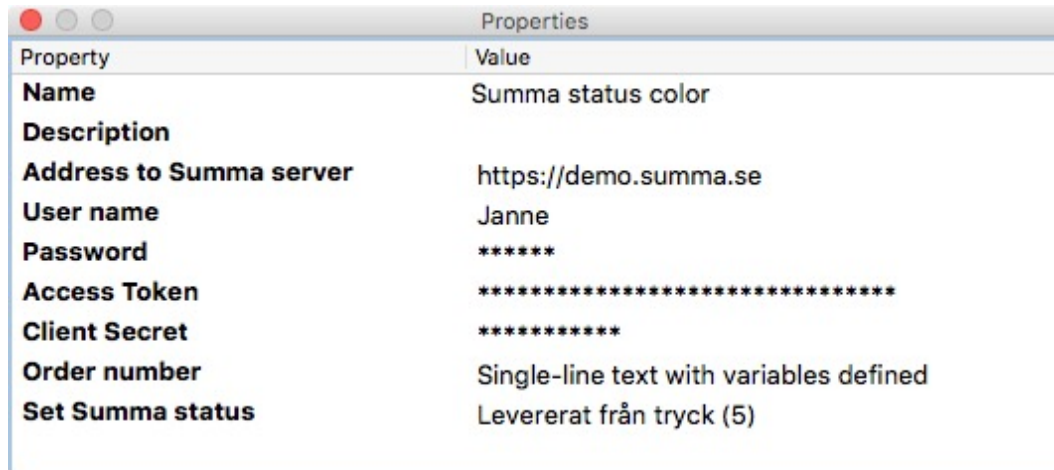

Connections

The app has only one input connection and only one outgoing connection. No settings are available of the outgoing connection.

Properties detailed info

In the settings you have the connection details and login information and the color code for the status.

Flow element properties

Property	Value
Name	Summa status color
Description	
Address to Summa server	https://demo.summa.se
User name	Janne
Password	*****
Access Token	*****
Client Secret	*****
Order number	Single-line text with variables defined
Set Summa status	Levererat från tryck (5)

- Address to Summa server
 - The URL to your Summa server, only use the domain name.
- User name
 - Your user name to access the Summa server.
- Password
 - Your account password.
- Access Token
 - The Access Token code for the Summa connection.
- Client Secret
 - The Client Secret code for the Summa connection.
- Order number
 - The Summa OrderNo (ordernumber for the job in Summa).

- Set Summa status
 - When selecting the option “Select from library” you will get a list of all available status codes in your Summa system. The status codes are listed as text with a status number.
 - “Inline value” lets you specify a value. In this case it is sufficient to provide the number of the status.
 - Other selections can be done with Switch variables or scripts. In this case too you only have to provide the number.
