List Magic

Description
This app allows you to create a Switch job for every row in a CSV file.

Compatibility
Switch 18 update 2 and higher.

Connections
Allows for one folder input and one folder output.

Folder 23   List Magic   Folder 24

Properties detailed info
Each value requires a key, but each key does not require a value.

Flow elements properties
- Delimiter
  Specifies the delimiter for each row. This is a dropdown list of pre-set delimiters but there is an option for a custom delimiter.
- Other delimiter
  Specifies a custom delimiter. This can be an inline value, single line text with variables, or script expression.
- Counter width
  Specifies the padding on a piece of row data. This can be a number.
- Keep original file
  Yes-No list, if activated sends the original file as a job through Switch.
- Debug
  Yes-No list, if activated displays additional messages in Switch for troubleshooting.
