JS CSV Writer is a NodeJS based CSV Writer / Data Logger. Use JS CSV Writer to record flow details or to record logs. Quick and easy to setup CSV Writer will make you record keeping a breeze.

Compatibility

Switch 2020 spring and higher.

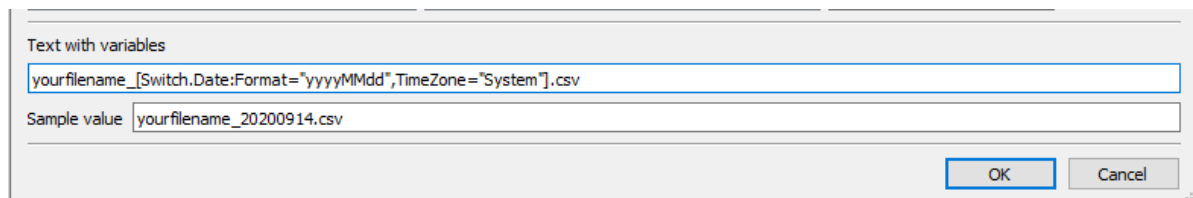

Connections

This app is a single output connection.

Properties detailed info

CSV folder path : Full path to the folder where the CSV file is to be saved

CSV filename : This is the complete filename for the CSV file including the file extension for example "mycsvfile.csv". For daily records or log files use the Single-line text with variables, log files will be saved daily by using "yourfilename_[Switch.Date:Format="yyyyMMdd",TimeZone="System"].csv"

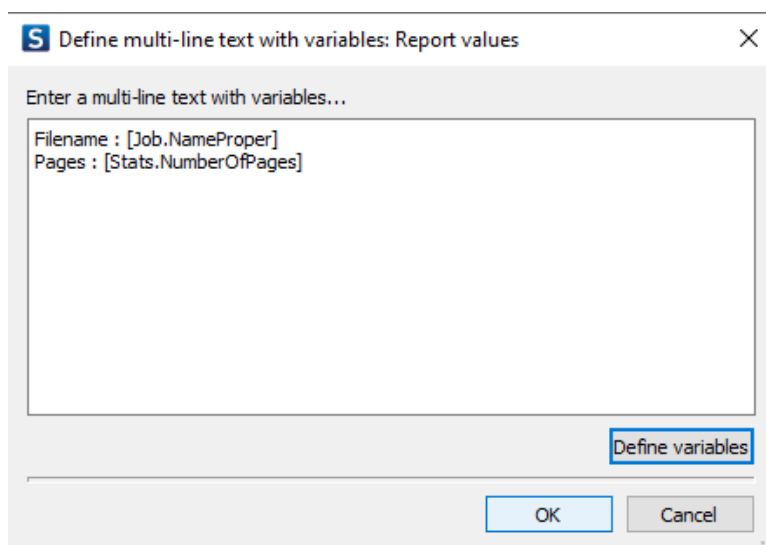

Text with variables

yourfilename_[Switch.Date:Format="yyyyMMdd",TimeZone="System"].csv

Sample value: yourfilename_20200914.csv

OK Cancel

Report values : Use the Multi-line text with variables to list your required Header Names and variable data. One line for each value to be recorded separated by a colon.

S Define multi-line text with variables: Report values

Enter a multi-line text with variables...

Filename : [Job.NameProper]
Pages : [Stats.NumberOfPages]

Define variables

OK Cancel
