

Send SMS Twilio

Description

Send SMS messages from Switch with Twilio as provider. You need an account at Twilio to be able to use the app.

It can be convenient to sometimes send out SMS messages to customers with information about the job currently in processing. Or to the system manager reporting errors in Switch.

You can create an account for Twilio here: <https://www.twilio.com/>

It is possible to have a testing account for a limited number of messages.

Compatibility

Switch 20 Windows or Mac OSX.

Compatibility third-party applications

No third party applications are used by this app.

Connections

Send SMS Twilio has traffic light outgoing connections for Success and Error. No settings are available for the outgoing connection.

Private data

If there is any problem with the SMS sending failing, the provider will send back an error message that will be shown in the Switch logs. The error message is also saved as a Private data entry with the private data key = **SMS error**
This can be useful and used for reporting the errors in an email or to a database.
