

FireStarter

Description

FireStarter lets you start a (dummy) job on interval. It will create a FireStarter.txt file and injects it into the Switch Workflow.

Compatibility

Enfocus Switch 2020 Fall (Win/Mac) and newer.

App fields

Field name	Description
Every x	Interval. E.g.: Every 1 minute. This field holds a numerical value
Unit	Seconds/Minutes/Hours/Days/Weeks

Outgoing connections properties

FireStarter has one outgoing connection. This connection holds all created (dummy) jobs.
