

Push Dataset

V1.0 Documentation

Overview

A very simple tool to retrieve the absolute path of an attached dataset and record the value to a private data key. Useful in scenarios when wanting to export a dataset - ignoring the incoming file and pushing out the dataset only. While exporting, you also have the ability to pickup the incoming job as a newly created dataset!

Compatibility

Switch 2022 Spring and higher. Windows and Mac OSX

Incoming Connections

At least one incoming connection required.

Outgoing Connections

At least one outgoing Traffic Light connection required.

Flow Element Properties

- Dataset: Name of the dataset to push down the success path.
- Outgoing filename: Outgoing filename of the dataset to push down the success path. If *Automatic* is specified, the incoming job name will be used on output.
- Store incoming as dataset?: Do we want to store the incoming file as a dataset (if it has not been already)? (Yes/No)
 - Name: The newly created dataset name.
 - Type: Type of the newly created dataset. (JDF/JSON/Opaque/XML/XMP)

About Significans Automation

Significans Automation is a software integrator specializing in delivering next-generation automation to the Printing and Packaging industry.

We offer programming and expertise in custom workflow development, deployment of communication and project management systems, color management, and end-to-end business integration. While upholding software neutrality, Significans Automation advises and tailors best in class software to optimally fit the environment.

The level of sophistication that is provided increases profitability, improved quality control, and enhanced production efficiency, enabling Artificial Intelligence and Robotics, while also facilitating new revenue opportunities in e-commerce. We are driven by the conviction that customized automation is the only path forward.
