OSX CUPS Printer
Version 2

Description
This app allows a Switch flow to print job files on any Mac OS X CUPS printer. Only single file jobs are supported - not job folders. The job must be in a format supported by CUPS, eg. PDF, Postscript, text or an image format such as JPEG, TIFF, PNG, etc. Other file formats such as Indesign are not supported by CUPS and will have to be converted to PDF prior to printing with this app.

Compatibility
macOS only
Switch 2018 update 3 or later

Connections
At least one input connection is required.
Output connections are optional. If none are defined, the job will be deleted.
Flow elements properties
