

## Script Private data

### Description

This app will let you use script expressions for Private data values.

### Compatibility

Switch 2022 fall and higher. Windows or Mac OSX.

Note: Switch Scripting module is required.

### Connections

This app can have several input or output connections. No settings are available of the outgoing connection.

### Properties detailed info

You can have up to five different Private data keys and scripts in the properties.

### Flow element properties

#### Private data key (1 to 5)

The key for the Private data. This value has to be empty if no script is used.

#### Private data script (1 to 5)

Opens the Script expression editor where you write your script code that will be the Private data key value.
